<https://youtu.be/WLDARkKs-T4>

Try to revisit your own life experience and pick one story, and leverage generative AI to create a **compelling** video.

- **Learning Objectives:**
 - Students will be able to use AI tools to generate a script and character image.
 - Students will be able to use an image-to-video tool to create a short film.
 - Students will be able to apply best practices for character consistency and dialogue.
- **Instructions:**
 1. Choose a simple story concept for a 15-30 second short film.
 2. Use an AI scriptwriting tool to generate a script for your film.

3. Use an AI image generation tool to create a character for your film. The character can be yourself or imagined. Attention on the character consistency. Multiple-characters are highly encouraged!
4. Use an image-to-video tool to bring your character and script to life.
5. Submit your final video along with a brief reflection on the creative process.

- **Deliverables:**

- A 400-word report on
 - A video file (MP4 or MOV) uploaded to <https://mediaspace.illinois.edu/> (<https://mediaspace.illinois.edu/>).
 - Make sure the video is shared publicly.
 - Link should be included in the report.
 - Please be prepared that your videos will be shared with the class for discussion, so only include shareable information in your submission.
- 1) the creation steps
 - specify the tools
 - provide full prompts you used from the beginning to the end. If you mix real video clips with AI generated ones, please make sure at least 70% of the content is generated by AI.
 - the video must be longer than 1 min and less than 3 mins. Your video should be made by at least two video clips generated by AI. This is to show you can create consistent characters or scenarios.
- 2) document the challenges and creative opportunities of using the AI tool for your video creation, including but not limited the following topics:
 - What difficulties did you have?
 - What are the potential ethical implications of using AI to demonstrate real-life experiences?
 - What are the current limitations of this technology, and how might they be overcome in the future?
 - How can we ensure that this technology is used for good and not for malicious purposes?

Effort Estimation

- **Approximate Time:** 4-5 hours for high quality videos

Effort Level: Medium - requires analysis and application.

Grading Rubric – Turning Your Story into a Video (100 points)

1. Story Concept & Creativity (15 points)

- **Excellent (13–15):** Story is clear, engaging, and meaningful. Concept shows originality and strong connection to personal or imagined experience. Multiple characters/scenarios used effectively.
 - **Good (10–12):** Story is coherent and interesting but may lack depth, originality, or polish.
 - **Fair (7–9):** Story is simplistic or underdeveloped; minimal creativity applied.
 - **Poor (0–6):** Story is unclear, fragmented, or missing.
-

2. Use of AI Tools for Script & Character Design (20 points)

- **Excellent (18–20):** Student effectively uses AI scriptwriting and image-generation tools. Full prompts are included in the report. Character(s) are consistent across multiple clips; dialogue/script is well integrated.
 - **Good (14–17):** AI tools are used adequately, but character consistency or script execution shows minor flaws. Prompts documented but may lack detail.
 - **Fair (10–13):** Limited use of AI tools; prompts incomplete; character or dialogue consistency weak.
 - **Poor (0–9):** Little to no evidence of using AI tools; character/script missing or inconsistent.
-

3. Video Production Quality (20 points)

- **Excellent (18–20):** Video is 1–3 minutes, contains at least two AI-generated clips, and maintains high coherence (consistent characters/scenarios). Technical execution is smooth (audio, pacing, visuals).
- **Good (14–17):** Meets length and clip requirements with minor technical issues (transitions, timing, clarity).
- **Fair (10–13):** Length or clip requirements barely met; noticeable technical flaws hinder viewing.
- **Poor (0–9):** Video under 1 min or over 3 min; lacks two AI-generated clips; serious quality issues.

4. Reflection & Report (25 points)

- **Creation Steps & Prompts (10 pts)**
 - **Excellent (9–10):** Clear, detailed step-by-step account with full prompts and tools used. Explains mixing real vs AI content.
 - **Good (7–8):** Steps included but missing some details or prompts.
 - **Fair (5–6):** Minimal detail; unclear process.
 - **Poor (0–4):** Incomplete or missing description.
 - **Challenges, Ethics, & Opportunities (15 pts)**
 - **Excellent (13–15):** Thoughtful, critical reflection on challenges, ethical implications, tech limitations, and future use.
 - **Good (10–12):** Reflection addresses most points but lacks depth or critical insight.
 - **Fair (7–9):** Superficial or incomplete discussion of challenges/ethics.
 - **Poor (0–6):** Reflection missing or shows little effort.
-

5. Effort & Professionalism (20 points)

- **Excellent (18–20):** Work shows strong effort, attention to detail, and alignment with assignment requirements. Video is polished, report well-written, and link works correctly.
 - **Good (14–17):** Adequate effort; minor issues with polish or requirements.
 - **Fair (10–13):** Effort evident but several missing elements or sloppy execution.
 - **Poor (0–9):** Minimal effort; multiple missing requirements.
-

Final Grade Breakdown

- Story Concept & Creativity – **15 points**
- Use of AI Tools – **20 points**
- Video Production Quality – **20 points**
- Reflection & Report – **25 points**

- Effort & Professionalism – **20 points**

Total: 100 points
